**RISK ASSESSMENT  
METHOD STATEMENTS**

#GTAdvantage

**WHAT IS A RISK ASSESMENT?**

A Risk Assessment is simply a careful examination of what, in your work, could have the potential to cause harm to people, so that you can assess whether you have taken enough precautions or should do more to prevent harm in the workplace.

A Risk Assessment is a key factor in protecting employees and your business, as well as complying with the Law. It identifies risks within your company and work operations and the ones with the potential to cause harm.

**5 STEPS TO TAKE TO ASSESS THE RISKS IN YOUR WORKPLACE...**

You can find more information and help on managing risk within various industries at [gtaccess.co.uk](http://gtaccess.co.uk)

**SO WHAT IS A RISK ASSESSMENT METHOD STATEMENT?**

A work Method Statement sometimes called a “Safe System of Work” is a document that details the way a work task or process is to be completed.

The Method Statement should outline the hazards involved and detail a step by step guide on how to do the job safely, it will also detail which “control measures” are to be introduced to ensure the safety of everyone who is affected by the task or work process.
