

SAFETY EQUIPMENT

DON'T GAMBLE WITH YOUR SAFETY

Always wear the correct Personal Protective Equipment when working at height

#GTAdvantage

ALL THE CORRECT SAFETY GEAR FOR WORKING AT HEIGHT

Having the correct safety gear and adequate training when working at height is a critical component in ensuring the safety of operators.

It is recommended for boom type MEWPs that a double point full body harness to EN361 and an adjustable lanyard is used to provide protection from being catapulted from the access platform.

DOUBLE POINT HARNESSSES

Double point harness with front and rear D ring attachment points, Easy-Click Quick connect buckles and high comfort webbing.

MULTI-IMPACT HELMETS

An industrial quality helmet for work at height and general site safety. The Multi Pro helmet is built to last and has provision for all standard accessories.

ADJUSTABLE LANYARDS

Remove the risk of falls from an elevated work platform with a shortened lanyard.

ANNUAL HARNESS INSPECTIONS AND TRAINING INSPECTIONS AND TRAINING

IPAF recommend that all harnesses are inspected by a competent trained inspector on an annual basis to remain compliant. GTAccess can carry out these inspections for a small cost.

We also hold half day IPAF Harness Safety training courses at all our training centres.
